

SMART CITIES : A BRIEF REVIEW

Graduate Seminar II

Ishan Bharatbhai Khatri

Dept. of Electrical and Computer Engineering,
Prairie View A&M University, Prairie View, Texas 77446

Acknowledgment

Table of Contents

1 Background

- Smart Grid & Applications of Forecasting & Classification
- Challenges
- Problem Statement
- Main Contribution

2 Methodology

- Datasets
- Implementation based on Deep Learning

3 Conclusion

- Future Work

4 Questions

Smart Grid I

Challenges I

Problem Statement

Main Contribution

Table of Contents

1 Background

- Smart Grid & Applications of Forecasting & Classification
- Challenges
- Problem Statement
- Main Contribution

2 Methodology

- Datasets
- Implementation based on Deep Learning

3 Conclusion

- Future Work

4 Questions

Datasets for Forecasting I

Deep learning based Load Forecasting I

Table of Contents

1 Background

- Smart Grid & Applications of Forecasting & Classification
- Challenges
- Problem Statement
- Main Contribution

2 Methodology

- Datasets
- Implementation based on Deep Learning

3 Conclusion

- Future Work

4 Questions

Conclusion

Future Work

Table of Contents

1 Background

- Smart Grid & Applications of Forecasting & Classification
- Challenges
- Problem Statement
- Main Contribution

2 Methodology

- Datasets
- Implementation based on Deep Learning

3 Conclusion

- Future Work
